The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statement of Water Division and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Statement of Water Division and Use must be filed by riparian and per 1914 appropriate water users. Since 1914, new appropriators have been required to obtain a permit and license record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assesses the State to determine if additional water is available for future appropriators.

An appropriative right is required for use of water on nonirrigated land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license statement of water division and use filed by riparian water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assesses the State to determine if additional water is available for future appropriators.
